CITIZENS PROPERTY INSURANCE CORPORATION

BUILDING TYPE II AND III MITIGATION INSPECTION FORM

This Mitigation Inspection Form must be completed to capture mitigation features applicable to a Type II (4 to 6 story) or Type III (7 or more story) building. This Inspection Form is required for either residential condominium unit owners or commercial residential applicants requesting mitigation credits in such buildings.

WIND LOSS MITIGATION INFORMATION

PREMISES #:		SUBJECT OF INSURAN	CE:	Altamira at North Hutchinson Island	POLICY #:			
BUILDING #:	1	STREET ADDRESS: 4310 N. A1a Fort Pierce, FL 34949						
	13							
# STORIES: 13 BLDG DESCRIPTION: 4310 N. A1a BUILDING TYPE: II (4 to 6 stories) III (7 or more stories)								
BOILDING TIPE. II (4 to 6 stories) M III (7 or more stories)								
Terrain Exposure Category must be provided for each insured location.								
I hereby certify that the building or unit at the address indicated above TERRAIN EXPOSURE CATEGORY as defined under the Florida Building Code is (Check One): X Exposure C or Exposure B								
Certification below for purposes of TERRAIN EXPOSURE CATEGORY above does not require personal inspection of the premises.								
Built On or After	Certification of Wind Speed is required to establish the basic wind speed of the location (Complete for Terrain B only if Year Built On or After Jan.1, 2002).							
I hereby certify that the basic WIND SPEED of the building or unit at the address indicated above based upon county wind speed lines defined under the Florida Building Code (FBC) is (Check One): ☐ ≥100 or ☐ ≥110 or ☐ ≥120								
Certification of Wind Design is required when the buildings is constructed in a manner to exceed the basic wind speed design established for the structure location (Complete for Terrain B only if Year Built On or After Jan.1, 2002).								
I hereby certify that the building or unit at the address indicated above is designed and mitigated to the Florida Building Code (FBC) WIND DESIGN of (Check One): ☐ ≥100 or ☐ ≥110 or ☒ ≥120								
Certification for the purpose of establishing the basic WIND SPEED or WIND SPEED DESIGN above does not require personal inspection of the premises.								
Specify the type of mitigation device(s) installed: NOTE: Any documentation used in validating the compliance or existence of each construction or mitigation attribute must accompany this form. At least one photo documenting the existence of each visible and accessible construction or mitigation attribute marked in Sections 1 through 4 must accompany this form.								
1. Ro	of Co	verings						
Roof Covering Material: Membrane Date of Installation: 2021 (21030904, 3/9/2021)								
Level A (Non FBC Equivalent) – Type II or III One or more roof coverings that do not meet the FBC Equivalent definition requirements below.								
ズ Level B (FBC Equivalent) – Type II or III								

*This verification form is valid for up to five (5) years provided no material changes have been made to the structure or inaccuracies found on the form.

Single-Ply, Modified Bitumen, Sprayed Polyurethane foam, Metal, Tile, Built-up, Asphalt Shingle or Rolled Roofing, or other roof covering membranes/products that at a minimum meet the 2001 or later Florida Building Code or the 1994 South Florida Building Code and have a Miami-Dade NOA or FBC 2001 Product Approval listing that is/was current

All mechanical equipment must be adequately tied to the roof deck to resist overturning and sliding during high winds. Any flat roof covering with flashing or coping must be mechanically attached to the structure with face fasteners (no clip/cleat systems), and asphalt roof coverings on flat roofs must be 10 years old or less.

at the time of installation.
