

Coach Lights — No ARB review is needed.

1.) Coach lights must be white in color and must be replaced in sets so that all installed fixtures are identical in style. The fixtures must be wired for automatic control by a photocell sensor to turn on at dusk and off at dawn as originally installed by the developer. (Note: The photocell is typically located on the outer-wall side of the garage mounted to the underside of the soffit.)

Trillium HOA Approved Coach Lights

Pictured below are the three styles of HOA approved coach lights. The left image is the original style installed by the developer that has an exposed section beneath the lamp socket. The right and middle are an alternate style that completely encloses the lamp socket. (Note: Images are not proportioned to scale.) Both styles are available for purchase from retailers or online.

Original Coach Light Information

The original coach light information Hampton Bay Model HB7027-06 is no longer available. – **PLEASE SEE BELOW FOR APPROVED ALTERNATE COACH LIGHTS.**
